

Special Education Needs Department

“Our challenges do not limit our abilities”

Every student has unique individual needs. We provide a programme that meets the academic, physical, social, behavioural, and emotional needs of every student through individually-planned, systematically-modified and monitored teaching procedures.

This department intends to transform people, processes and places in a dynamic way. We develop, co-ordinate and implement a special programme to improve students' academic success and socio-economic development.

The Special Education Needs Department includes the Special Education Unit at Campus B, the Learning Centre at Campus A, D.O.V.E. 2 and learning support in Mathematics, English, Language Skills and Humanities. Our department serves students from Year 1 to Year 5.

We also celebrate Special Education Week during the month of March. We conduct different activities such as a special general assembly, church service, practical skills exhibitions, parental workshops, fun day, student and benefactor awards.
